

Acme Dental: From 21% no-shows to a 24/7 front desk

Medical/Dental · 2 locations · Go-live May 2026

The Challenge

Acme Dental's two front-desk staff spent most of their day on the phone: booking, rescheduling, chasing insurance details and calling no-shows. 1 in 3 calls went to voicemail during lunch and after hours. No-show rate was 21%, costing an estimated \$9,000/month in empty chairs.

The Solution

We deployed the clinic AI suite: 24/7 SMS + voice booking, insurance intake before visits, a 48h/24h/2h reminder cadence, and automatic rebooking of no-shows. Integration with EagleSoft and Google Calendar took 9 days; go-live was in 14.

Results

No-show rate	21% → 9%
Appointments booked by AI	312 / month
Insurance verified pre-visit	91%
Front-desk hours saved	~38 / month
After-hours calls answered	100%

"It feels like hiring a third receptionist who never sleeps, never takes lunch, and never forgets a reminder."
